

## Members of the Town Council

Farmers have benefited for many years receiving premium prices for rural, residential properties of 3, 5 or 10 acres. Families moved here and paid these prices, to benefit the quiet environment, scenic values and a positive rural experience.

Now all these values will be destroyed, if the sand mine is approved.

The future for these rural residential families will be noise, blasting, excessive traffic and what even worse the disappearance of our beautiful hills. This is in many ways worse than living in the middle of a busy industrial city.

Please don't let them ruin our lovely neighborhood.

We are so blessed to live in this wonderful place - please don't let the sand mine ruin our lives and home.
